

sp-react-chartjs-2

Create a new repository

Create a new repository

A repository contains all the files for your project, including the revision history.

Owner: Haddley / Repository name: sp-react-chartjs-2 ✓

Great repository names are short and memorable. Need inspiration? How about **sturdy-potato**.

Description (optional): Makes Chart.js 2 features available to SharePoint users using react-chartjs-2 wrapper

☒ Public
Anyone can see this repository. You choose who can commit.

☐ Private
You choose who can see and commit to this repository.

☒ Initialize this repository with a README
This will let you immediately clone the repository to your computer. Skip this step if you're importing an existing repository.

>git clone <https://github.com/Haddley/sp-react-chartjs-2.git>

```

      Congratulations!
      Solution sp-react-chartjs-2 is created.
      Run gulp serve to play with it!

 We're working on a new SharePoint admin center. [Try the preview](#)

apps

[App Catalog](#)
Make apps available to your organization and manage requests for apps. An app catalog is required to disable Store purchases for end users.

[Purchase Apps](#)
Purchase apps from the SharePoint Store.

[Manage Licenses](#)
Manage licenses for apps purchased from the SharePoint Store.

[Configure Store Settings](#)
Manage app acquisition settings including turning off purchases for end users in the SharePoint Store.

[Monitor Apps](#)
Track usage of applications and review errors.

[App Permissions](#)
Manage app access to this tenant.

[Feedback](#)

sp-react-chartjs-2-client-side-solution

Do you trust sp-react-chartjs-2-client-side-solution?

The client-side solution you are about to deploy contains full trust client side code. The components in the solution can, and usually do, run in full trust, and no resource usage restrictions are placed on them.

This client side solution will get content from the following domains:

SharePoint Online

☒ Make this solution available to all sites in the organization

Deploy | Cancel

Deploy this client-side solution to all sites.
